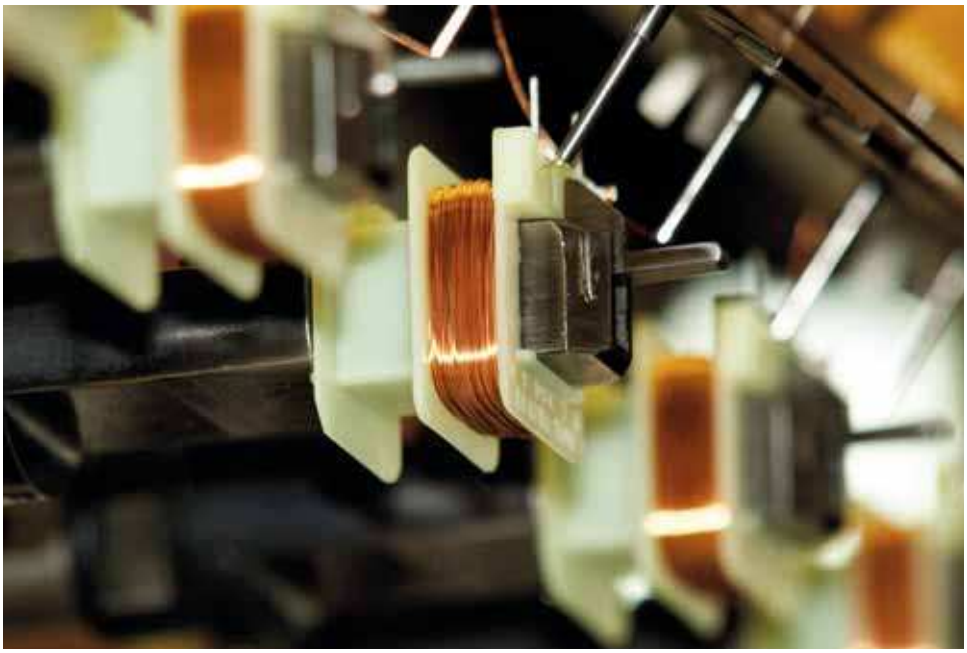
Interesting news about HAHN



HAHN Quality – Performance that builds trust.

HAHN-History

This has been the corporate philosophy of the HAHN company since its foundation in 1949. Right from the start, it was the maxim of HAHN to supply products of high quality and to base all efforts on customer-requirements and satisfaction. Corporate growth has been achieved to a dynamic and reliable extent. The ongoing expansion of the manufacturing facilities furthered the improvement in quality and HAHN was able to invest in new products. Today, HAHN employs a workforce of approaching 500, which serve an international clientele in various industrial sectors. HAHN's principal aim is to continue to supply quality products and to provide reliable customer service and thus contribute to the success of its customers.

1949
- Founded on April 21st, the company was registered as an armature winding works, repair shop for electric motors, generators, electrical installations and the sale of domestic electrical appliances

1969
- September – commencement of small size transformer production in the storage space of the newly renovated electrical installation shop

1971
- Construction of the first new hall building of 700 square meters floor space

1981
- Opening of new production and warehouse hall of 1,600 total square meters floor space

1985
- Extension of the production floor space by some 600 square meters

1990
- Extension of the storage space by some 500 square meters

1994
- Removal of the final inspection and quality control facility and the standard transformer inventory into a new hall building of some 1,000 square meter floor space

1995
- A new raw materials' and semi-finished products' warehouse was constructed with a floor area of some 600 square meters

1996
- Award of the DIN EN ISO 9001:1994 certification
- New warehouse and goods' consignment facility was constructed with a floor space of some 600 square meters

1998
- Commissioning of the new manufacturing facility in Güsten
- Extension of the trading floor space by some 20,000 square meters
- Production capacity was extended by 20%
- A new reception area was opened

2002
- Award of the DIN EN ISO 9001:2000 certification for the locations at Hungen and Güsten in Germany

2003
- Approval/Authorization of an UL-Electro-Isolation-System class F (HAHN 155-1)
- Disposable and reusable packagings are given the designation 'Blue Angel'

2004
- A third manufacturing facility has been set up in the Ukraine

2005
- Starting production in our new manufacturing facility in Ukraine

2008
- Award of the DIN EN ISO 9001:2008 certification for the location at Hungen, Güsten and Ukraine
- Approval/Authorization of an UL-Electro-Isolation-System class B (HAHN 130-1)

2009/2010
- Hungen works – Site expansion with warehouse building transformed into high-bay warehouse, extended staff car park
- Güsten works – Further investments in automation
- Ukraine works – Continuous increase in production capacity

2011/2012
- Structure and beginning of production for ignition transformers at plant Güsten
- Approval/Authorization of 2nd UL-Electro-Isolation-System class F (HAHN 155-2)
- Update of the approvals according to DIN EN 61558-1/2005 and DIN EN 61558-2-6/2009 for all HAHN-Series-Products
- Continuous increase in production capacity

HAHN Locations

The parent company in Hungen, Germany
All the business decisions of HAHN are taken here, just only half an hour away by car from Frankfurt's International Airport; in terms of a qualitative and consumer-oriented corporate cultural philosophy. New, user-friendly products are developed here. Progressive production technology for highest process quality and economically high volume is located here. All employees are trained to satisfy customer requirements all over the world.

Production in Güsten, Saxony-Anhalt, Germany
The rising demand for HAHN products in Eastern European countries made it necessary to transfer partial production into a region near the border in order to reduce logistical costs.

3rd Production Plant in Novovolynsk (Ukraine)
With foundation of the 3rd plant in Eastern Europe, HAHN removed the manual production from plant Hungen and Güsten to Novovolynsk. Custom-made and wage-intensive products made this step necessary to be as one of the leading transformer producer further more competitive on the constantly growing market.

HAHN Electronic Component Parts

Quality awareness, product liability legislation and the growing demands of worldwide markets today make it necessary for equipment and appliance manufacturers to pass on these stringent requirements to their subcontractors and suppliers to ensure, that no component or assembly can become a critical weak spot. HAHN successfully meets these requirements. All products leaving the HAHN works have been manufactured of high grade, quality-controlled raw materials or semi-manufactures on the most modern production equipment. A quality management system meeting **DIN EN ISO 9001:2008** German and European standards provides the means for ensuring such high quality.

HAHN permanently maintains a large stock inventory of all items and sizes. Customers can take advantage of this service as required, by means of placing call orders – no matter what item of size is required – the comprehensive range from capacities 0.35 VA to 200.0 VA is always available. A detailed overview can be found on the following pages of this catalog.

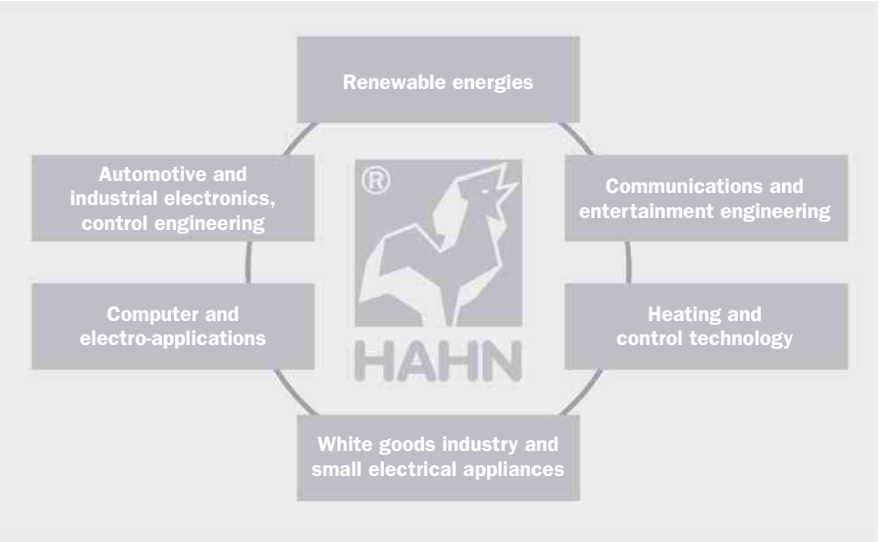
HAHN has its own laboratory with TDAP the qualification for all the prerequisites, to carry out tests for VDE-marks, an expert's report or for certificates in an international procedure together with VDE-experts to carry out.

More electrical safety and long service life for consumers' appliances

- Chokes
- Coils, custom-made coils
- Control transformers
- Current- and voltage converters
- Flat-type transformers
- Inductive assembly components
- Isolating transformers
- Mains transformers
- Printed circuit-board transformers
- Safety transformers
- Single-phase transformers
- Small size transformers
- SMPS-transformers
- Special transformers
- Three-phase transformers
- Ignition transformers and electronic ignition devices

All HAHN transformers carry a test certificate, so that customers obtain an assurance of maximum electrical safety and long service-life for their equipment and appliances. HAHN invites new customers and other interested parties to place their reliance on its quality products and services.

Highest quality and customer-orientated services in all industries



Quality and economy in the production process

HAHN products are characterized by their performance and reliability. Ongoing in-house quality control management ensures uncompromising raw material selection and the highest standards of production with the corporate aim of achieving reliability and an optimum of economy and efficiency for customers.

To ensure the competitiveness of its products, HAHN attaches great importance to automation in production. Modern technology with automatic assembly lines, integrated quality control devices, transfer systems and ‘intelligent’ production equipment are the prerequisites for highly rationalised and flexible manufacturing facilities. This minimizes costs and positively influences the marketability of its products. All the corporate-related decisions of HAHN are thus taken from an economic and ecological viewpoint. HAHN already exceeds such requirements by implementing numerous appropriate measures of such a nature. For example, all works-internal movements are carried out with electric vehicles and in the areas of production and distribution, HAHN employs reusable packaging.

All according to customer requirements

Packed and consigned

In order to meet the requirements of any specific trade and industry, HAHN can provide practically any desired problem solution in the areas of packing and distribution. No matter whether customers require cases, cartons, polystyrene or plastic packagings – whether ‘just-in-time’ delivery, special forwarding services or self collection – HAHN can always provide customers with the right problem solution. The examples mentioned above meet current standards, whereby the new designed plastic tubes is worthy of special mention. The transformers can thus be extracted from a ‘magazine’ and inserted directly into customers’ production. ESD-conform packaging is contemporary and has come to stay on the European market. HAHN will, of course re-accept packagings returned in a usable condition. These can be cleaned and used again for further consignments to customers.

We have expanded our program for you in the course of ErP (Energy related Products).

The **ErP Serie 2013** of **HAHN** is perfect for applications of the electric power supply in electrical and electronic household and office equipment with “stand by” and “off” conditions. Already today where a reduced **power consumption** of $P_0 < 0,4$ W is required, the **ErP Serie 2013** of **HAHN** will be a solution.

- Primary voltages up to 250 V
- Secondary voltages 2 V to max. 38 V or 2 x 2 V to max. 2 x 19 V
- Output Power up to 2.8 VA
- Short-circuit-proof
- Temperature class ta 70 °C/F
- Vacuum-encapsulated, bobbin with dual chamber windings
- Per item tested quality with certificate
- Excellent temperature fluctuation resistance properties
- Self-extinguishing cast housing and sealing material
- Minimal size available

Ecological in design – and solutions based on switch mode technology developed by **HAHN**. Within the scope of the Eco-Design Directive for energy-related products, we have expanded our product portfolio for you.

The new **HS series** by **HAHN** incorporating switch mode technology has a no load power loss of **< 0.15 W** and an efficiency of > 70 %! It is ideal for applications within the broad input voltage range of 85 – 265 V for power supplies.

Design is short-circuit-proof and wiring is strictly isolated according to DIN EN 61558-2-16 and DIN EN 60950. All components are UL- and DIN EN 60335-compliant. The power of the safety extra-low output voltage is up to 3 W.

- Minimal size available
- Primary voltages from 12 V to 250 V
- Secondary voltages from 4 V to 24 V or 2 x 3 V to 2 x 12 V
- Output Power up to 0.5 VA
- Further voltages on demand
- Inherently short-circuit-proof
- Vacuum-encapsulated, bobbin type with dual chamber windings
- Temperature class ta 70 °C/B
- High electrical safety and long service-life features
- Per item tested quality with certificate
- Excellent temperature fluctuation resistance properties
- Self-extinguishing cast housing and sealing material

Thanks to its minimal size the BV 20 is the ideal problem solution for appliance manufacturers requiring small components and who are not prepared to enter into any comprises as regards quality and performance demands. Processing with double-coated windings, special extreme heat-resistant epoxy insulating resins and self-extinguishing encapsulation housing materials give HAHN transformers extra electrical safety reserves enabling applications of extreme limits to be addressed.
The BV 20 with insulation class B properties is especially suitable for printed circuit boards, computer processors, other electronic applications, domestic appliances, telecommunications', lighting and photo technologies. Particularly in regard to competitiveness on international markets and the product liability of manufacturers, the BV 20 offers users the greatest functional electrical safety and long-life service by reason of its superior quality for their products.

- Minimal size available

Several hundreds of types provide safety and long service-life for printed circuit boards, household appliances, leisure electronics, heating and control technol ogy as well as in assembly techniques. Transformers for special requirements with lower open-circuit (no-load) loss capacity are also available in the range.

Enhanced customer benefit due to ongoing high quality standards throughout 40 years experience in transformer technology.

- according to REACH regulation
- according to RoHs regulation

- Primary voltages up to 230 V
- Secondary voltages from 2 V to max. 38 V
- Output Power up to 8.0 VA
- Temperature class ta 70 °C/B
- Short-circuit-proof
- Vacuum-encapsulated, bobbin with dual chamber windings
- Per item tested quality with certificate
- Excellent temperature fluctuation resistance properties
- Self-extinguishing cast housing and sealing material
- Minimal size available

The EI 34 Series provides solutions for applications requiring low heights and a small base areas. HAHN offers rapid and economic problem solutions for customer applications especially developed by our experienced R&D development engineers. The EI 34 Transformers meet the stringent requirements of the DIN EN 61558 and DIN VDE 0570 standards. Short-circuit-proof and non short-circuit-proof transformers are available in five different stacking heights. Outputs from 1.6 VA to 8.0 VA, at an ambient temperature of 70 °C, are supplyable to meet customer requirements in encapsulated versions.

HAHN has established itself on the market as a reliable and innovative supplier with its application-oriented solutions.

	UL 5085-1	**UL**	E98173
	C22.2	**CSA**	1290235

- according to REACH regulation
- according to RoHs regulation

- Output Power up to 4.5 VA
- Non short-circuit-proof at temperature class ta 70 °C/B
- Standard type cast housing “0”
- Excellent temperature fluctuation resistance properties
- High electrical safety and long service-life features
- High voltage resistance
- Self-extinguishing cast housing and sealing material
- Per item tested quality with certificate

Protection extern secondary by:
- Micro fuse according to IEC 127 or
- PTC resistance

Individual version!

Parallel to the cataloged EI 60 series transformers, HAHN also produces other variants, e.g. with integrated thermo fuse or thermo switch, other housing-, fixing- and connective options as well as non-encapsulated transformers.

	C22.2	**CSA**	1486889

- according to REACH regulation
- according to RoHs regulation

- Output Power up to 50.0 VA
- Non short-circuit-proof at temperature class ta 70 °C/B
- Standard type cast housing “KK”
- Excellent temperature fluctuation resistance properties
- High electrical safety and long service-life features
- High voltage resistance
- Self-extinguishing cast housing and sealing material
- Per item tested quality with certificate

Protection extern secondary by:
- Micro fuse according to IEC 127 or
- PTC resistance

Connecting pins type cast housing “KK” with 4 fixing straps

	C22.2	**CSA**	1077600

- according to REACH regulation
- according to RoHs regulation

- Output Power up to 60.0 VA
- Temperature class ta 70 °C/B, non short-circuit-proof
- Excellent temperature fluctuation resistance properties
- Vacuum-encapsulated, bobbin type with dual chamber windings
- High electrical safety and long service-life features
- High voltage resistance up to 6000 V
- Self-extinguishing cast housing and sealing material
- Per item tested quality with certificate

Protection extern secondary by:
- Micro fuse according to IEC 127 or
- PTC resistance

Parallel to the cataloged UI 48 series transformers, HAHN also produces other variants, e.g. with integrated thermo fuse or thermo switch.

	UL 5085-1	**UL**	on request
	C22.2	**CSA**	on request

- according to REACH regulation
- according to RoHs regulation

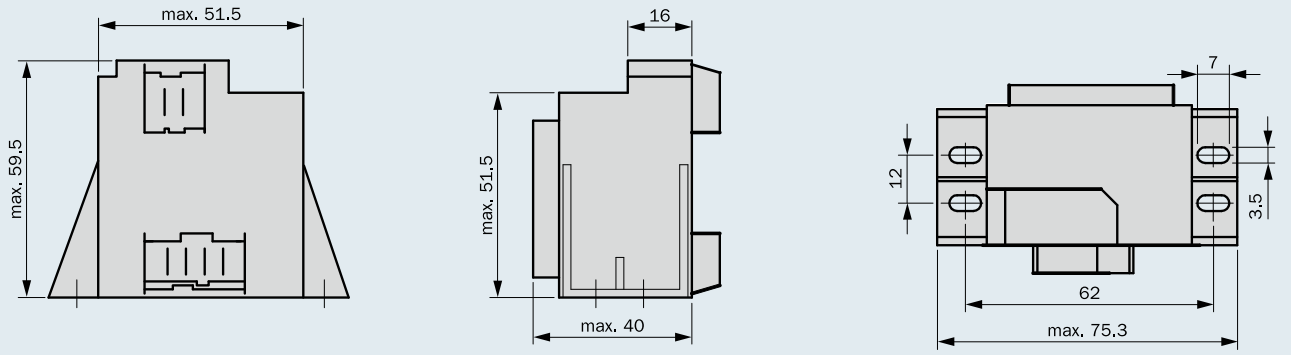
- High Output Power up to 120.0 VA
- Primary voltages from 12 V to 400 V
- Secondary voltages from 6 V to 24 V or 2 x 6 V to 2 x 24 V
- Minimal size available
- Vacuum-encapsulated, bobbin with dual chamber windings
- Per item tested quality with certificate
- Temperature class ta 70 °C/B meeting VDE 0570/DIN EN 61558 regulations
- High electrical safety and long service-life features
- Excellent temperature fluctuation resistance properties
- Self-extinguishing cast housing and sealing material

RAST 5 Transformers frame size EI 48 to EI 84.
All transformers of the RAST 5 series are equipped with a variable user-friendly parallel-wired connector to VDE 0627/ PM 906 (Regulations of the Association of German Electrical Engineers). This greatly facilitates the assembly of the components by as much as a third. It only remains to attach the lead connectors to the primary and secondary sides. The tedious and time-consuming routines of soldering, screw-attachment or individual plug-ins is no longer required. Especially coded connectors with form guides ensure proper assembly. Confusion in connecting up routines is impossible, even for a layman. Lead connectors are prefabricated, thus also reducing costs.

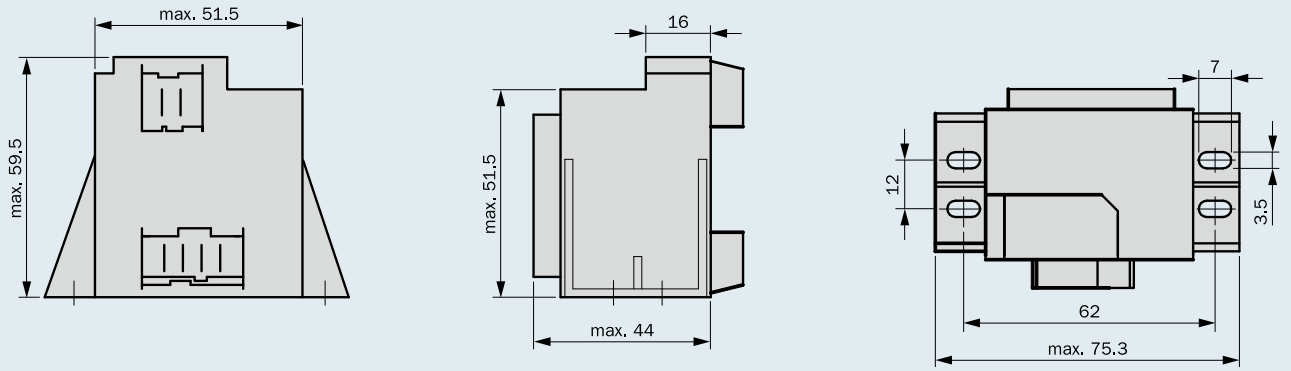
The RAST 5 interconnective techniques developed by HAHN for transformers provide makers of electrical and white goods with assured economical- and electrical safety aspects in the manufacture of appliances.

Frame size	Output Power ta 70 °C/B	Packaging unit
EI 48 / 16.8	10.0 VA	12 pieces
EI 48 / 20.5	12.0 VA	12 pieces
EI 54/ 18.8	16.0 VA	10 pieces

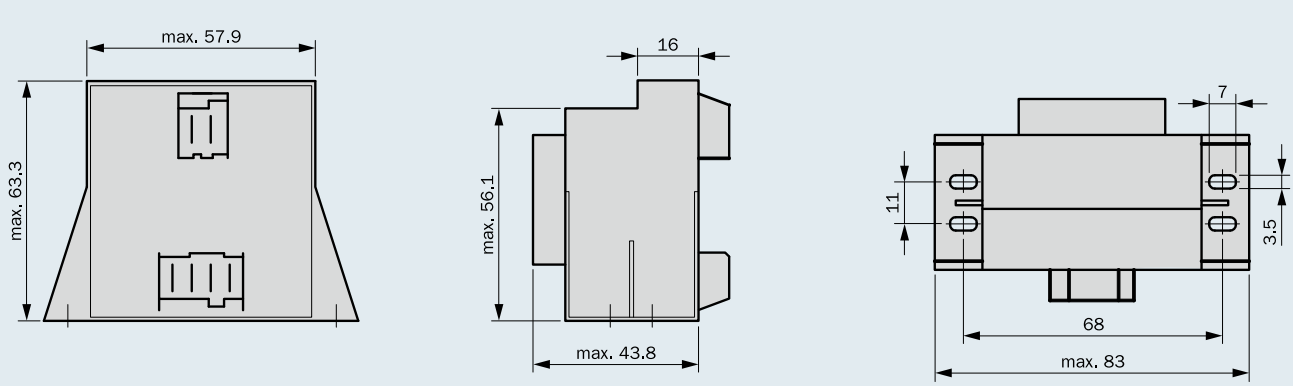
Connecting pins Version EI 48 / 16.8



Connecting pins Version EI 48 / 20.5



Connecting pins Version EI 54 / 18.8



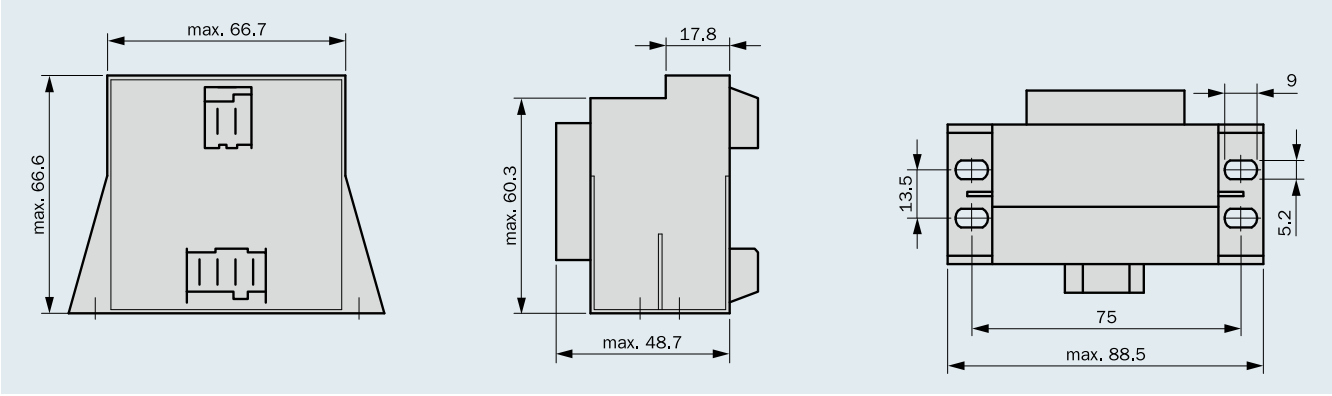
Transformers
Output Power:
20.0 VA – 40.0 VA

RAST 5

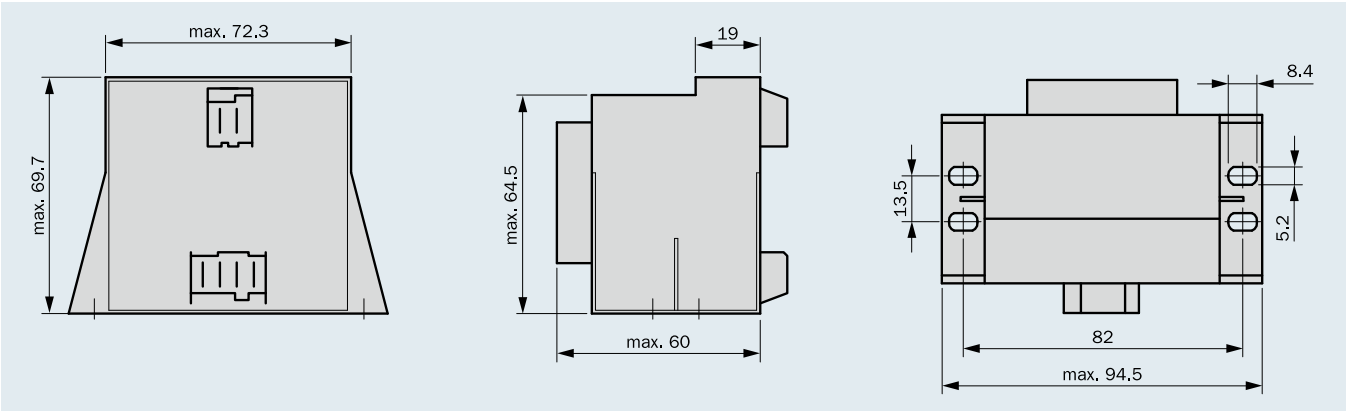
Frame size	Output Power ta 70 °C/B	Packaging unit
EI 60 / 21.0	20.0 VA	8 pieces
EI 66 / 30.0	40.0 VA	8 pieces

Maximum Convenience combined with cogent Quality. Equipped with service- and user-friendly connective techniques plus the usual quality benefits of the EI transformer series. Designed to customer requirements – capacities from 10.0 VA to 120.0 VA. Temperature class ta 70 °C/B. Vacuum encapsu lated items are, subjected of course to 100 % quality control.

Connecting pins Version EI 60 / 21.0



Connecting pins Version EI 66 / 30.0



Transformers

Output Power:

50.0 VA – 120.0 VA

RAST 5

Frame size	Output Power ta 70 °C/B	Packaging unit
EI 78 / 27.5	50.0 VA	4 pieces
EI 84 / 43.5	120.0 VA	4 pieces

Maximum Convenience combined with cogent Quality. Equipped with service- and user-friendly connective techniques plus the usual quality benefits of the EI transformer series. Designed to customer requirements – capacities from 10.0 VA to 120.0 VA. Temperature class ta 70 °C/B. Vacuum encapsu lated items are, subjected of course to 100 % quality control.

- Individual version 4 mm creeping distance

Flyback converters for Switch Mode Power Supplies

EF

HAHN flyback converters with the following characteristics:
- Construction to DIN EN 61 558, DIN EN 60 950
- Operational frequency 10 – 500 kHz
- Increased creeping distance 12 mm possible

Insulating material classification
- E / 120 °C
- B / 130 °C (optional)
- F / 155 °C (optional)
- UL 9 – V0 (optional)
- 100 % unleaded

100 % piece inspections
- Inductivity
- Turns ratio
- Winding direction
- Voltage resistance (50 Hz / 1 s)

Switch Mode Power Supplies with HAHN flyback converters – can be employed for lower and middle range capacities with the structural size quantities EF 12.6 to EF 30.0. Through the use of high-quality of core materials it is possible to reach working frequencies up to the MHZ-area.

Considerable know-how and specialist experience in transformer technology for open, encapsulated, impregnated or vacuum encapsulated converters are guarantees for HAHN quality and optimum customer benefit.

Current developments in electronic components involve ever shorter research and development time periods and every greater manufacturing reliability.

HAHN has the opportunity of optimally developing flyback converters for well known manufacturers of regulator controllers, e. g. Power Integration, Infinion, Philips or ON Semiconductor as customer-specific components. These were all rapid-, economic- and high quality problem solutions from HAHN.

Frame size	Output Power*	Packaging unit
EF 12.6/4	up to 5 W	300 pieces
EF 16/5	up to 9 W	176 pieces
EF 20/6	up to 20 W	176 pieces
EF 25/7	up to 45 W	60 pieces
EF 30/7	up to 70 W	48 pieces

* dependent on input voltage range and switch governor type

HAHN has the opportunity of optimally developing flyback converters for well known manufacturers of regulator controllers, e.g. Power Integration, Infinion, Philips or ON Semiconductor as customer-specific components. These were all rapid-, economic- and high quality problem solutions from HAHN.

Ignition transformers

- Ignition transformers
- Electronic ignition devices

Ignition transformers

For safe and stable ignition of gas heating systems!

- Circuit board assembly
- Compact design
- For unipolar or bipolar ignition
- For one or two ignition points
- Stringent individual quality-testing
- Self-extinguishing potting and housing material

Ignition transformers from HAHN guarantee safe and stable ignition of your gas-powered heating systems. Compact in design, they are ideal for use with printed circuit boards.

Within our comprehensive Quality Management System which includes several interim checks, each component is subjected to a final 100% test. In this test, not only the characteristic data are checked but a high-voltage insulation test is carried out.

The specially selected components are all subjected to a glow wire test according to DIN EN 60 335-1:2005, section 30.2.3.

Electronic ignition devices

For safe and stable ignition of boiler systems in the heating industry.

Electronic stroke-spark ignition for use in gas-condensing boiler systems. High-performance ignition for oil-burning systems.

- Voltages 230 V~ and 120 V~
- Single- or dual-pole ignition
- One or two ignition points
- Quality is based on individual testing
- EMV according to DIN EN 55014-1 and DIN EN 55014-2
- Construction according to DIN EN 60335-1 and DIN EN 60335-2-102

Electronic ignition devices from HAHN are designed according to the highest requirements in heating and industrial plants.

Continuous monitoring of all process steps and the use of top-quality components guarantee safety, reliability and durability. All components are subjected to a 100% individual final check. Here, not only characteristic data are checked; integrated high-voltage tests are carried out that guarantee voltage stability. All ignition devices are compliant with current national and international standards.

For the user, national regulations are binding. Protection from electrical contact is the responsibility of the user.

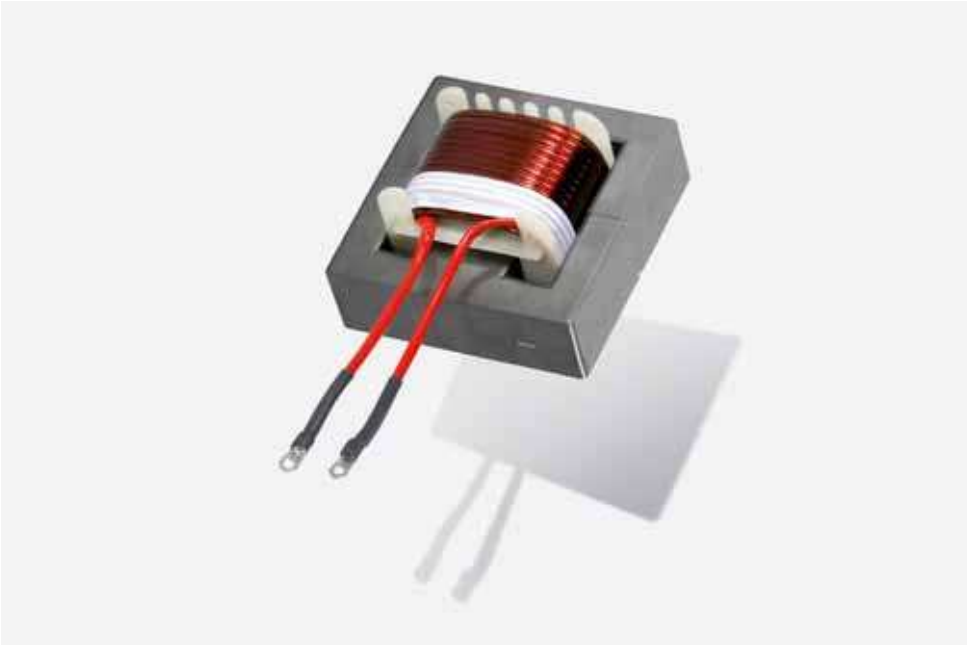
Choke program

- Extended mains choke series
- Extensive range of customer-specific chokes



Choke program

We supply green power!
The increasing requirements regarding the electromagnetic compatibility of network harmonics according to DIN EN 61000 -3 has motivated HAHN to provide economical solutions for optimizing your products – whether by supplying alternative energy to networks or by reducing harmonics caused by conversion.

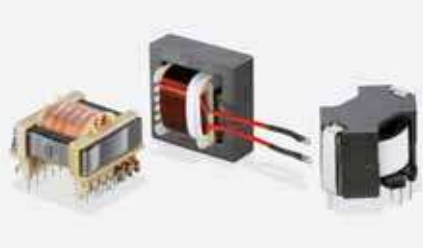
HAHN, with its vast experience and technical know-how, is now able to provide solutions in the form of a wide range of customized coils. The application areas comprise smoothing chokes, commutation chokes, power chokes, PFC chokes and storage chokes in various core materials such as laminated sheet metal, tape-wound core, iron powder and ferrite.

Whether it's a matter of designing a choke, optimizing connections and wiring, assembly via foot angle or top-hat rail G 35, our vastly experienced team of highly qualified development engineers will be able to help.

Choke program

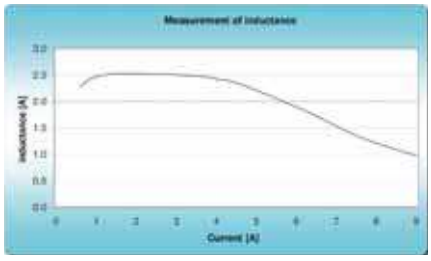
Laminated Iron Core Chokes/Tape-wound Core Choke
- Frequency range 0–400 Hz
- Current range 0–200 A
- Types EI 30 to EI 120, UI 30 to UI 120, tape-wound core SUI
- Open, impregnated or vacuum-encapsulated
- Economically priced and customized to your own specific requirements with respect to design, fitting and contacting

Iron Powder Core Chokes
- Frequency range 0–100 kHz
- Current range 0–30 A
- Types: toroidal or pot core
- Open, impregnated or vacuum-encapsulated
- Economically priced and customized to your own specific requirements with respect to design, fitting and contacting

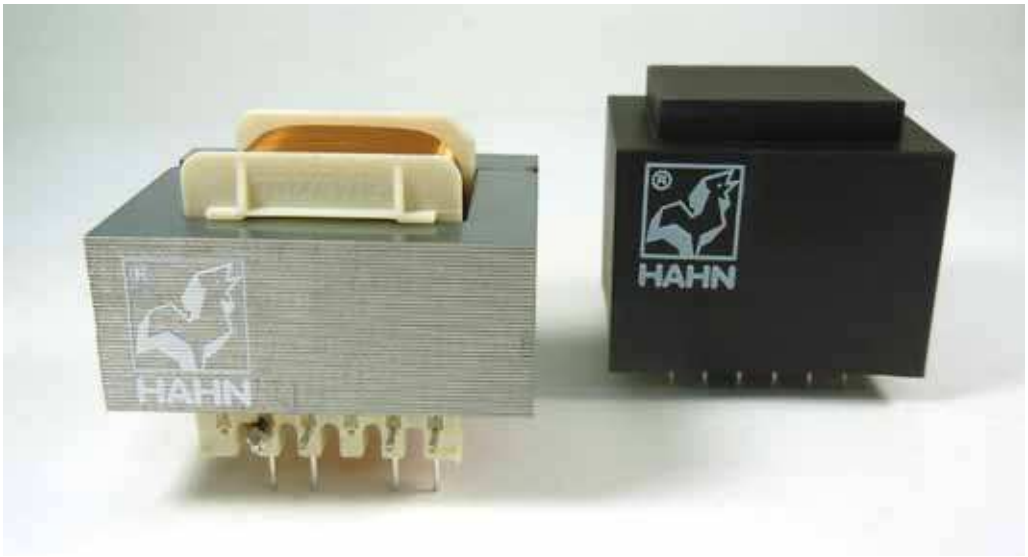


Ferrite Chokes
- Frequency range 10 kHz–1 MHz
- Current range 0–200 A
- Types EE 13–EE 120, RM, PQ, UI to 126, toroidal
- Open, impregnated or vacuum-encapsulated
- Economically priced and customized to your own specific requirements with respect to design, fitting and contacting

Lead by Know-how!
By using state-of-the-art measurement technology and through cooperation with a technical university in the area of EMC, HAHN is able to provide you with comprehensive support right from the beginning of your development work. This will save you time and money.



Extended mains choke Series



One of the most important environmental conditions for the smooth operation of electrical equipment is a reliable quality of supply networks. Disturbances and influences caused by power-ups, switching power supplies, frequency controllers, etc., endanger equipment and systems in their operational safety.
A significant area of the disturbances and influences on the mains voltage set phase effects; they do arise when resources are operated with a nonlinear current - voltage characteristic or with non-stationary operating behavior of a power grid. This problem of network perturbations gains through the increased use of power electronics with increased emission increasingly important.

In view of the increasing network pollution and the necessary reduction to comply with the power network stability, the requirements are to be adapted to device manufacturers to comply with the electromagnetic compatibility. With the harmonization of EU Directive 2004/108/EC towards the new version 2014/30/EG with effect from 20th April 2016, new guidelines have been applied for the marketing of new devices in Europe.

In order to meet these future requirements on the grid-connected emissions, HAHN provides you already an extended mains choke series, which allows you within very short time to optimize the EMC-features of your device, compliant to the new standard location.

With a power range up to 10 A as well as a wide range of inductance values, this series covers completely the range of common household appliances using their typical plug connected load. Through compliance with the standards in relation to the relevant standards EN 61558-2-20 for chokes , EN 62041, as well as the compliance with the glow wire tests of all materials used in accordance with EN 60335-1 and the use of insulation to the insulation class B and F UL 1446 , the integration of these components is quick and easy.

Investments in new measurement techniques also allow customized solutions.
Our HAHN development team and our technical support team will be happy to answer your questions.

Special solutions

- Electrical Power Supply Facilities / Supply units
- Transformers Top-Hat-Rail Fixtures EI 48 – EI 78
- Transformers in open version, vacuum impregnated version
- Customer-specific winding goods / Fine-wire-coils

Electrical Power Supply Facilities / Supply units

Safety coupled with HAHN quality for your applications!
Should you need an AC or DC power supply?
These are available from HAHN with integrated components (residual ripple < = 5 %).

Today, our flexible production allows us to make transformers both with and without rectification. Special safeguards protect your products in line with the stringent requirements of VDE/ ENEC and UL. Our highly qualified and experienced HAHN developers coupled with our own tooling facility guarantee rapid and economic solutions for you.

Our technical superiority, comprehensive Quality Management and interim testing programs for each individual component guarantee reliable functionality.

Our highly flexible production concept, proven technology and product experience makes it possible to fulfill and technically implement practically any individual requirements you may have along with the amounts you require.

Transformers both with and without secure insulation, automatic transformers and unregulated power supplies round off the HAHN product range. Our own development and production within Europe guarantee solutions with optimal customer benefits.

Electrical Power Supply Facilities / Supply units

Custom-made bunch of cables

- Vacuum-encapsulated, dual chamber windings
- Excellent temperature fluctuation reactivity
- Highest degrees of safety and durability
- High degree of voltage-leak resistance
- Self-extinguishing cast housing and sealing material
- Per item tested quality with certificate
- Transformers conform to European Standard DIN EN 61558 and UL 1310

Fuse elements

Following supply connector variants are possible

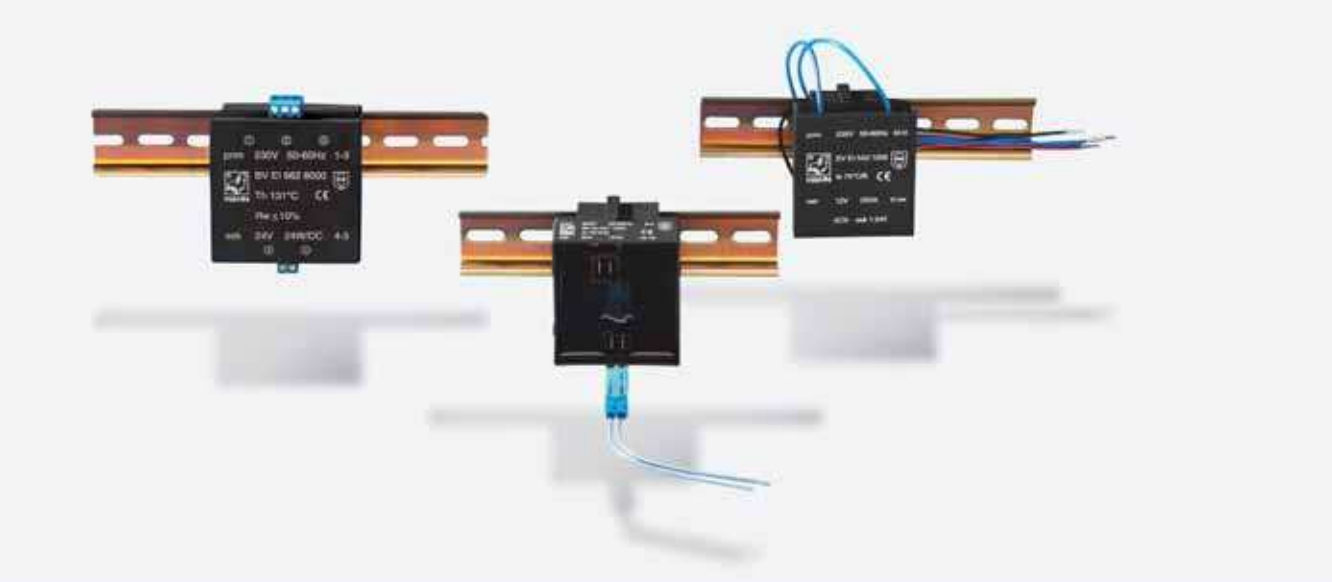
- Flat plugs
- Rast 5
- Terminal blocks
- Custom-made connectors

Rectifier units

	Frame size	Output Power (max.)	Dimensions (axbxh)
AC	EI 48	12.0 W* / ta 70°C/B	
DC	EI 48	6.0 VA* / ta 40°C/B	
AC	EI 54	20.0 VA* / ta 70°C/B	60x64x52
DC	EI 54	10.0 W* / ta 40°C/B	60x64x52
AC	EI 60	30.0 VA* / ta 70°C/B	66x67x60
DC	EI 60	16.0 W* / ta 40°C/B	66x67x60
AC	EI 66	47.0 VA* / ta 70°C/B	72x70x66
DC	EI 66	24.0 W* / ta 40°C/B	72x70x66
AC	EI 78	60.0 VA* / ta 70°C/B	84x76x74
DC	EI 78	40.0 W* / ta 40°C/B	84x76x74
AC	EI 84	100.0 VA* / ta 70°C/B	91x80x79
DC	EI 84	50.0 W* / ta 40°C/B	91x80x79

*dependent on types of supply connection and circuit breaking facilities

Transformers for Top-Hat-Rail Fixtures



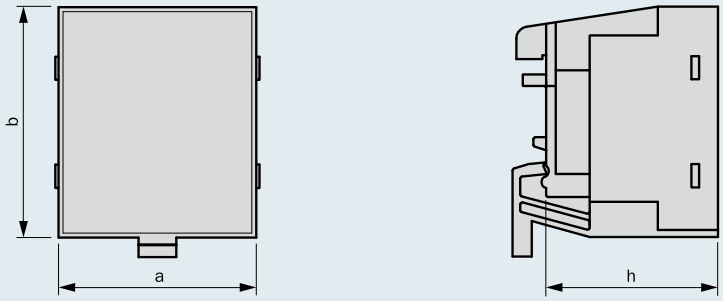
- Vacuum-encapsulated, dual chamber windings
- Excellent temperature fluctuation reactivity
- Highest degrees of safety and durability
- High degree of voltage-leak resistance
- self-extinguishing sealing material
- Per item tested quality with certificate
- Transformers conform to European Standard DIN EN 61558

Following supply connector variants are possible
- Flat plugs
- Rast 5
- Terminal blocks
- Custom-made connectors

HAHN quality now available for switchgear cabinets and domestic supply services
HAHN transformers are suitable for mounting in switchgear cabinets with the application of special encapsulation bonnets complying with German Industrial and European Standard: DIN EN 50 022 and equipped with snap-on fixtures. These encapsulated transformers stand for optimal durability and a rapid simplified mounting for such facilities.

Ongoing quality control – even at the level of components – as well as 100 % piece verification ensures the highest degree of quality from the HAHN works.

Connecting pins version RAST 5



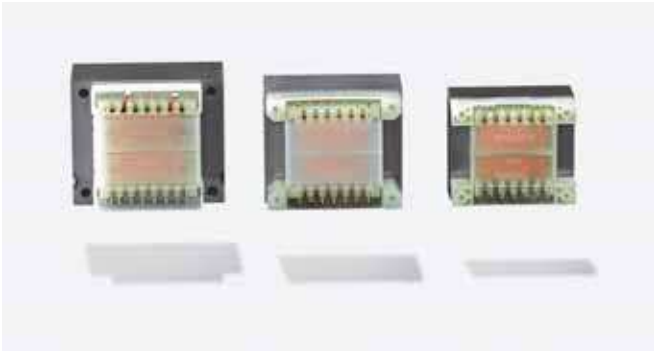
Dimensions without tolerance indications ± 1 mm

Frame Size	Output Power ta 70 °C/B	Dimensions (a x b x h)
EI 48	12.0 VA*	max. 53.8 x 61.1 x 45
EI 54	20.0 VA*	max. 59.7 x 64.2 x 52
EI 60	30.0 VA*	max. 66.2 x 67.1 x 60
EI 66	47.0 VA*	max. 72.2 x 70.1 x 66
EI 78	60.0 VA*	max. 84.7 x 78.6 x 74

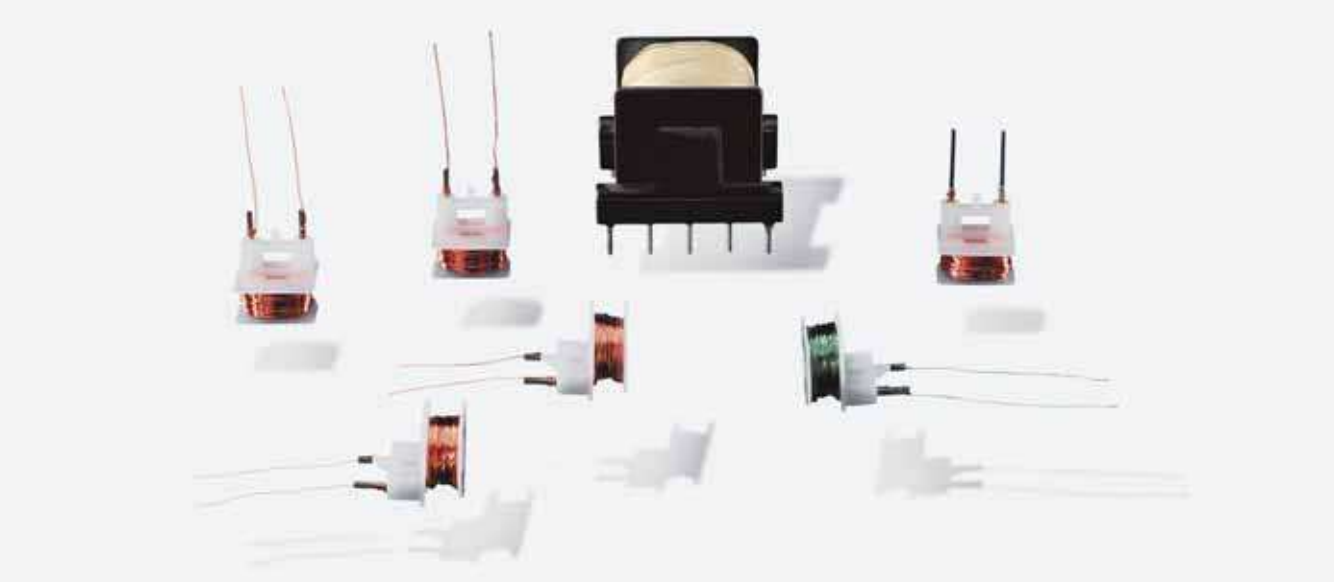
* dependent on types of supply connection and circuit breaking facilities

Transformers in open version, vacuum impregnated version

Open single-phase transformers for the power supply of appliances and assemblies. For applications with restricted spacing, HAHN's unsealed transformers are a real alternative. New versions have been introduced by reducing the casing volume. Reduced weights lead to reduced costs and can be realized in the form of printed circuit transformers, size EI 30 – EI 96 as well as UI 30 – UI 48. Applications for switch cabinets can be fitted with the sizes EI 60 – EI 150. Attachment facilities with angle pieces for top-hat rails are available. Impregnation with resin protects the unit against environmental impingements. The use of dual chamber bobbin windings guarantees an electrically safe galvanic separation to VDE 0570/DIN EN 61 558 regulations. The materials employed meet insulation class B (130 °C) minimum. Class F (155 °C) is also available on request.



Customer-specific winding goods / Fine-wire-coils



HAHN has gained a niche in the market as a reliable supplier of application-oriented special transformer coils. Our customer contact staff are exceedingly well motivated and contribute extensively to the success of the business.

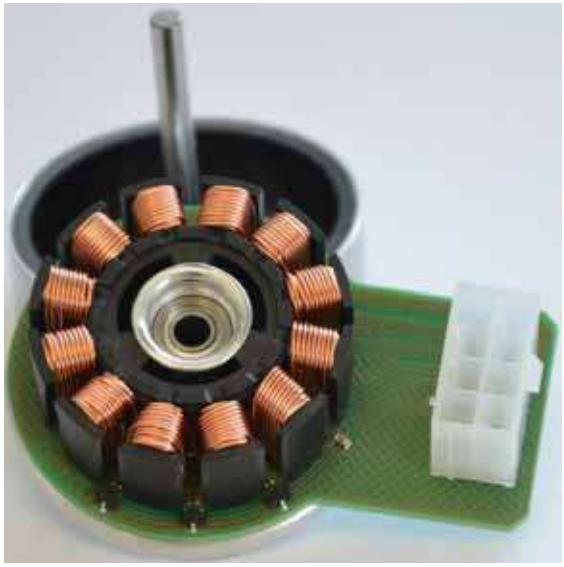
HAHN is already able to produce special transformer coils in all the various constructions types to consumer specifications.

HAHN will work together with the customer to develop all manner of applications to obtain an appropriate and viable problem solution. The high grade quality of HAHN products and the readiness of the HAHN organisation to provide an appropriate customer service are also contributions to the success of the business.

HAHN's secret lies in the employment of optimised components and the consequent exploitation inherent in the possibilities of hi-tech manufacturing. This enables specialty components in high grade quality to be produced in conjunction with many years of close collaboration with its subcontractors and suppliers as well as the benefit of flexible manufacturing facilities. HAHN's experienced research and development department and its special in-house tooling facility are guarantees for rapid and economic problem solutions straight from the HAHN works.

No matter whether small amounts or large volumes – the highly flexible manufacturing concept with extensively automated production equipment – makes it possible to meet practically any consumer requirement and to implement this materially and technically; and, this not only in a highly economic manner but also on a short-term basis.

Pole coil winding goods for BLDC motor



The BLDC motor (brushless DC motor) is constructed as a three-phase synchronous machine whose efficiency exceeds 85%. It is characterized by its long life and smooth running.

Applications of BLDC are e.g. drives for fans and household appliances and compressors, model airplanes, electric actuator in the form of servo motors to drive systems for machine tools.

In addition, the BLDC motor meets the ErP guidelines. It is used for establishing requirements for the eco-design of energy related products (ERP).
This is what brings the efficiency of energy of motors, with regard to the environment and soaring energy costs, more and more into focus.

The energy efficiency of engines can be improved by:

- The use of dynamo sheet with improved magnetic properties
- Improving the cooling in the engine
- Reduction of production tolerances
- **Reduction of losses in the pole windings by**
  Optimization of winding structure / winding execution

With regard to the last point, the winding task, HAHN can rely on over 45 years of experience in production of coiled products.
From the beginning, HAHN relies on high product quality, innovation and progressive, solid expansion of production.

HAHN is distributing more than 100,000 pieces per day worldwide.

Due to our supportive development activity, we have experience in the coil construction, which is of significant importance for new developments. Together with our customers we bring this experience into their new projects in the field of coil design for BLDC motors.

In order to improve and realize the projects of our customers professionally, our R & D department and our technical support team of HAHN are available at any time.
